

Urban Planning and Civil Engagement

(ArcGIS Pro, ArcGIS CityEngine, ArcGIS Urban & ArcGIS Hub)

Level: Advanced

Duration: 13 h

LESSONS

[ArcGIS Urban: Smart City Planning | Esri Training Video](#)

- Duration 30mins

[ArcGIS Hub: An Introduction | Esri Training Video](#)

- Duration: 1hr
-

EXERCISES

[ArcGIS Urban Basics | Esri Training Web Course](#)

- Duration: 1 hr 10mins
- About: ArcGIS Urban improves planning and decision-making by applying GIS technology to urban planning. The application provides a way to manage your development plans, analyze factors contributing to decisions, and share information with stakeholders. In this course, you will learn about the benefits of ArcGIS Urban and examine the Urban model.
- Requirements: ArcGIS Online, ArcGIS Urban

[ArcGIS Urban: Importing Planning Data | Esri Training Web Course](#)

- Duration: 1hr 20mins
- About: After creating an ArcGIS Urban model, the next step is to import planning data into the model. An Urban model supports planning data such as space use, land use, and zoning. It is essential to understand the data type, data schema, and data connection of each one. In this course, you will learn about configuring types data and feature layers into an ArcGIS Urban model.
- Requirements: ArcGIS Online, ArcGIS Urban, Microsoft Excel 2007 or later

[Tutorial 1: Essential skills—ArcGIS CityEngine Resources | Documentation](#)

- Duration: 2hrs
- Requirements: ArcGIS CityEngine 2019 (or later)

[Sharing Open Data Using ArcGIS Hub \(Basic\) | Esri Training Web Course](#)

- Duration: 3hrs 30mins
- Requirements: ArcGIS Online

[Introduction to Green Infrastructure | Esri Training Web Course](#)

- Duration: 1hr
- Requirements: ArcGIS Online

[Building the Foundation for Green Infrastructure Planning | Esri Training Web Course](#)

- Duration: 2hrs
 - Requirements: ArcGIS Online
-

OTHER MATERIALS

[Esri Best Practices: Implementing ArcGIS Hub | Esri Training Video](#)
